

SHORT TERM MISSIONS 2012-2013

In 2012 9 short term missions were granted.

Mission number	Recipient	Position	Institute of affiliation	Host institute	Topic
STM 1	<i>Arno Swart</i>	Junior Researcher	RIVM, NL	AHVLA , UK	comparison of models of Salmonella contamination of layer flocks and table eggs
STM 2	<i>Angela van Hoek</i>	Junior Scientist	RIVM, NL	ISS, ITALY (EU CRL for E. coli)	Genetic polymorphisms in human and bovine <i>Escherichia coli</i> O157 STEC isolates from various European countries
STM 3	<i>Ana Vazquez</i>	Post-doctoral researcher	ISCII	University of Texas Center for Biodefense and Emerging Infectious Diseases	Study of the interactions of WNV with other flaviviruses in vector transmission: a model to incorporate new research techniques in Spain
STM 4	<i>Laura Hildago</i>	PhD student	UCM	Health Protection Agency, Colindale (Now PHE)	emerging antibiotic resistance mechanisms, such as aminoglycoside resistance methyltransferases or NDM-1 carbapenemase
STM 5	<i>Eric Niqueux</i>	Scientist; Deputy Head NRL	ANSES (Ploufragan)	AHVLA (Pathology; Specialist Scientific Support)	immuno-histochemistry as applied to Avian Influenza

STM 6	<i>Concepción Porrero Calonge</i>	Head of Unit and PhD student	UCM, Spain	National Food Institute -DTU , Denmark	antimicrobial resistance - genomic characterisation of <i>S aureus</i> . Area of study out-side EMIDA ERA-NET
STM 7	<i>Stephanie Nemeghaire</i>	PhD Student	CODA-CERVA, Belgium	ANSES -LYON , Fr (laboratory of bovine disease and meat hygiene)	characterisation of CNS from livestock
STM 8	<i>Hengamei Mirsepasi</i>	PhD Student	SSI, Italy	Univ Wageningen	technology transfer: establish an in vitro assay to determine precisely the invasive potential of IBD associated <i>E. coli</i>
STM 9	<i>Sophie Roussel</i>	Molecular typing team manager	ANSES (Maisons-Alfort), France	HPA (Staph ref Unit and Foodborne Pathogens Reference Unit)	Typing of <i>S aureus</i> and opportunities to collaborate on genomic analyses of <i>L. monocytogenes</i>
