

## 2014-2015

### SHORT TERM MISSIONS

In 2014 11 short term missions were granted.  
Summary table is shown below

Mission No.	Applicant	Position	Applicant Institute	Host Institute	Topic
STM2	Rosanna Drumo ISS	PhD Student	ISS	University Veterinary Medicine Hannover	training: manipulation of dendritic cells to study the interaction with Salmonella
STM4	Diego Florez Cuadrado	Predocctoral fellow	UCM	AHVLA	development of harmonised protocols - Campylobacter detection and virulence
STM6	Ana Sofia Ribeiro Duarte	Senior Scientist	DTU	UCM	better understanding of molecular approaches applied to AMR mobile determinants
STM7	Charlotta Lofstrom	PhD student and Senior Scientist	DTU	SVA	training and collaboration NSG and bioinformatics platform for zoonoses diagnostics
STM8	Sara PIREs	Senior Scientist	DTU Food	RIVM	collaboration, source attribution methods
STM9	Vitomir DJOKIC	PhD student	ANSES, Maisons-Alfort	RIVM	harmonisation of pathogen detection techniques from various food matrices: Toxoplasma gondii
STM11	Luisa Escobar	PhD student	CODA-CERVA	AHVLA	collaboration between CODA-CERVA and the AHVLA: assays for the detection of brucella
STM12	Kinga Maria Sulyok	PhD student	VMRI	CVI	cultivation of Coxiella burnetii, harmonisation of protocols for direct and indirect methods
STM3	Antonella Maugliani	Young Scientist	ISS	ANSES	training and harmonisation
STM5	Christen Rune Stensvold	Senior Scientist	SSI	Swedish National Institute of Public Health (FOHM) +	DNA extraction from oocysts for NGS, exchange of ideas for future collaborations
STM13	Lorraine MICHELET		ANSES, Maisons-Alfort	AHVLA	Translating conventional spoligo-VNTR method to the SNP method for Mycobacterium bovis.
